Amendments to the Specification

Please add the following new paragraph after paragraph ending at line 24, page 10.

The invention includes the following, as for example is disclosed above and in the drawings, for use with a hand manipulable, flowable, edible and spreadable material dispenser:

a) a dispensing nozzle associated with the dispenser to dispense said material,

b) and a spreader surface associated with the nozzle whereby the dispenser may be manipulated to cause the spreader surface to spread material dispensed via the nozzle,

c) said surface having the form of a spreader shelf carried by the dispenser and projecting forwardly, relative to the nozzle, the shelf connected to the dispenser,

d) the nozzle defining an outlet, the outlet and shelf having lateral widths substantially in excess of three times the thickness of the outlet, whereby as said material is dispensed forwardly through the aperture and over the shelf it becomes spread over the width of the shelf and beyond the shelf for spreading as a wide

layer deposited on an edible,

e) and protective structure extending crosswise of the nozzle in forwardly spaced proximate relation to the outlet and extending across the entire width of the outlet, said structure carried by the dispenser to project in the direction of the shelf and above the level of the shelf during said layer depositing.
